✅ File Name: docker-aliases.sh

```sh
# Helpful Docker command aliases

alias dps='docker ps'

alias dpsa='docker ps -a'

alias dimg='docker images'

alias drm='docker rm'

alias drmi='docker rmi'

alias dbuild='docker build -t'

alias dstop='docker stop'

alias dstart='docker start'

alias dexec='docker exec -it'
```

✅ Simple Commit Message:

chore: added docker command aliases script for quick use
